SURVEYS MADE AND ESTIMATES GIVEN FREE OF CHARGE.

No. 600. WOOD CHURCH.

As erected at Norwich, 1893.

Constructed according to the Specification on page 86.

TESTIMONIAL

From THE REV. M. S. JACKSON,
Vicar of St. Paul's, Norwich.

July 4th, 1893.

I have much pleasure in stating that Messrs. Boulton and Paul have built a new Mission Church of wood for this parish.

The building has been planned, designed, and carried out entirely by them, and the material and workmanship appear to be thoroughly sound, strong, and good, and promise to give complete satisfaction.

I have heard only expressions of pleasure and admiration in reference to the style and appearance of the building. It is certainly, both inside and out, a charming little church.

For Fittings, see page 91.

No. 600a. WOOD CHURCH.

As erected at Norwich, 1893, for the REV. G. S. BARRETT.

Constructed according to the Specification on page 86.

For Fittings, see page 91.

PLAN

TESTIMONIAL.

From the REV. G. S. BARRETT,
Bracondale.

I have much pleasure in testifying to the entire satisfaction which Messrs. Boulton and Paul's work has given to the Committee.

The Church is well built, tasteful in design, and commodiously furnished, and has been erected at a very reasonable cost.

No. 601.

WOOD CHURCH.

Constructed according to the Specification on page 86.

For Fittings, see page 91.

Estimates on application.

TESTIMONIALS.

From REV. W. J. C. LINDSAY, Rector of Llanvair.

I desire to express my entire satisfaction at the manner in which the work has been done. The materials appear to be of the best description; and the work has been well and carefully executed. Everybody who has seen the Hall has been much pleased with its appearance. It is excellent for acoustics.

From PLUMER ROOPER, Esq., Cefn Park.

I hereby certify that your men have erected the Mission Room at Cefn Park to my satisfaction. I consider the work very well done, and all details well looked to.

No. 602.
WOOD CHURCH.

Constructed according to the Specification
beneath.

Estimates on application.

SPECIFICATION OF CHURCHES.

Walls.

Constructed of strong unplanned deal framing, morticed and tenoned, and covered outside part with matchboarding, and part with rustic joint weather-boarding, $\frac{7}{8}$ in. thick. Lined with inodorous sheet felt and matchboarding.

Doors.

Framed, matchboarded, and gothic-headed, having ovolo moulded stops, each door fitted with strong hinges, good locks, and handles.

Windows.

Ovolo moulded casements about 18 in. wide, divided by mullions with moulded stops, glazed with 21-oz. sheet glass. Those casements which open for ventilation fitted with fastener and set-ope.

Flooring.

Red deal sleeper plates, joists, and planed rebated floor boards.

Roof.

Consisting of strong deal moulded principals, purlins, and best galvanized corrugated iron, 24 gauge, coated with pure Silesian spelter. Lined with matchboarding and felt. Capping to ridge. Gutters to eaves, and down-pipes to the ground. Projecting barge boards to gables.

Painting and Staining.

External woodwork stained with our preparation. Inside matchboarding of walls sized. Doors and window frames, and overlay pieces picked out in dark colour. Doors, casements, barge boards, gutters, and down-pipes painted three coats.

Carriage, Erection, Terms, &c., according to the Specification on page 92.

No. 603. WOOD CHURCH.

Constructed according
to the Specification on
page 86.

TESTIMONIAL

From
E. ARMSTRONG, Esq.
Strumpshaw.

I am very much pleased
with the Iron Building
you have erected, and my
friends all say they never
saw a Mission Room so
complete in every respect.

No. 300. IRON CHURCH, CHAPEL-OF-EASE.

TESTIMONIALS.

From Miss PALIN, Tallwylan.

Miss Palin is much satisfied with the
Iron Building. Should she ever require
such a building again, will employ them
instead of local carpenters.

From
ANDREW LOW, Esq., Bradfield.

Mr. Low has to inform Messrs. Boulton
and Paul that their workman has this
morning finished the erection of the Iron
Building; he wishes to express his satis-
faction with the work and the workman,
whom he has found most civil and obliging.

REGISTERED COPYRIGHT.

Constructed according to the Specification on page 86, but with iron outside walls in lieu of wood.

For Fittings, see page 91.

Estimates furnished on receipt of particulars of requirements, such as dimensions, or number of sittings, &c.

REGISTERED COPYRIGHT.

No. 462. WOOD CHURCH OR CHAPEL-OF-EASE.

Erected by us at Lancaster for the County Asylum.

Constructed according to the Specification on page 86.

TESTIMONIAL.

From DAVID M. CASSIDY, Esq., M.D., Medical Superintendent, The County Asylum, Lancaster.

Sept. 10th, 1892.

I beg to inform you that the building of our new Church has now been completed by your workmen. The whole has been done to the satisfaction of the Visiting Committee and myself, and we are all well pleased with the appearance the Church now presents.

SPECIFICATION

OF

IMPROVED PORTABLE WOOD HOUSES.

Walls.

Constructed of strong unplanned deal framing, morticed and tenoned, and covered outside part with matchboarding, and part with rustic joint weather-boarding, $\frac{3}{8}$ -in. thick.

Lining.

External walls lined with inodorous sheet felt and matchboarding, and partitions matchboarded on both sides.

Doors.

Six-panelled square-framed doors, having ovolo moulded stops, fitted with strong hinges, good locks and handles.

Windows.

Ovolo moulded casements about 18 in. wide, divided by mullions with moulded stops, glazed with 21-oz. sheet glass. Those casements which open for ventilation are fitted with fastener and set-ope.

Flooring.

Red deal sleeper plates, joists, and $\frac{3}{8}$ -in. planed floor boards.

Ceilings.

Matchboarded, and when beneath roof felted as well.

Roof.

Consisting of strong deal principals, purlins, and best galvanized corrugated iron, 24 gauge, coated with pure Silesian spelter. Felt for laps of same. Capping to ridge. Gutters to eaves, and down-pipes to the ground. Projecting barge boards to gables.

**Painting
and
Staining.**

External woodwork stained with our preparation. Inside matchboarding sized. Door and window frames, and overlay pieces picked out in different colour. Doors, casements, barge boards, gutters, and down-pipes painted three coats.

Carriage.

Carriage Paid to any principal goods station in England, or to docks for shipment. Carting from railway station to site of erection is not included in our estimates.

Packing will be charged for, but the amount will be allowed in full if cases are returned here carriage paid, purchaser carting to station.

Erection.

Erection by our men on purchaser's foundation.

Prices.

Our prices are put as low as possible compatible with best material and workmanship.

**Terms of
Payment.**

Half on delivery and the remainder on completion. Until fully paid for the title and ownership of any building shall remain the property of Boulton and Paul, and the same shall not be subject to any mortgage of the land on which it may be fixed.

Foundation.

Brickwork is recommended as the best foundation, and we strongly advise brick chimneys, the plan for which we will supply free on receipt of order, but we do not include any brickwork or drains in our estimates. This part of the work can usually be done by a local bricklayer, to the purchaser's advantage.

**Notice to Local
Authorities.**

All necessary notices to Local Authorities as to the erection of our buildings must be given by purchasers, as we cannot hold ourselves in any way responsible for the same.

No. 604. WOOD OR IRON HOSPITALS.

Constructed according to the Specification on page 92.

Estimates free on application.

PLAN.

TESTIMONIAL

From Miss STEEL, Pembroke House, Norwich.

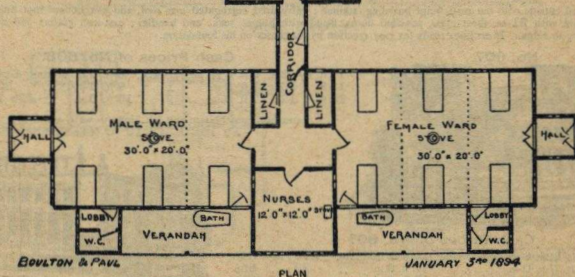

I forward cheque for the Children's Hospital, and I am pleased to say that it gives me great satisfaction. It is pretty outside, and comfortable inside, and well finished.

No. 604a. HOSPITAL.

THIS structure can be made to any size, and can be supplied without kitchen department,

Rooms for the staff can be arranged over the central portion of main building.

TESTIMONIAL

From Mr. and Mrs. PRESTON, Ellet Grange, Lancaster.

Dec. 14th, 1888.

Mr. and Mrs. Preston are very much pleased with the way your workman has looked after and executed the work of erecting the Cottage Hospital (No. 402) sent by Messrs. Boulton and Paul, and they hope if they give an order for any other building that Fairman may be sent to superintend it. The Hospital is very nice.

No. 606. WOOD AND IRON SCHOOL BUILDINGS.

Erected by us at Whitby for the MARQUIS OF NORMANDY.

Constructed according to the Specification on page 92.

TESTIMONIAL

From HERBERT KIRKLEY, Esq., Whitby.

21st Jan., 1893.

I have this morning looked over the new School you have erected for Lord Normanby, and have pleasure in stating the work has been completed to the satisfaction of his lordship.

WOOD STUDIOS OR WORKSHOPS.

WALLS covered outside with our rustic joint boarding, stained; galvanized corrugated iron roof, and matchboard roof lining, casement windows glazed with 21-oz. sheet glass, panelled doors, fitted with hinges, lock, and handles; cast-iron gutters and down-pipes to eaves; capping to ridge. In sections ready for easy erection by purchaser on his foundation.

ELEVATION

TESTIMONIAL.

From the REV. HENRY EDWARD HODSON.

I hereby certify that your men have erected the Parish Room, Verandah, and Green Room at the Lea Ross to my satisfaction. The building has been most cleverly contrived and thoroughly well carried out. We cannot speak too highly of the men you sent, such men and such work should be a good advertisement for your firm.

No. 465.**VILLAGE SCHOOL,**

with Master's Residence.

TESTIMONIAL

From EDWARD ARMSTRONG, Esq., Strumpshaw.

I am very much pleased with the Iron Building you have erected, and my friends all say they never saw a Mission Room so complete in every respect.

PLAN

No. 423. GALVANIZED IRON GYMNASIUM,

with Porch, Lavatory, and Visitors' Gallery.

REGISTERED DESIGN, No. 5989.

Constructed according to the Specification on page 92.

TESTIMONIALS.

From THE HON.
HARBORD HARBORD,
Ganton Park.

I beg to inform you that the Iron House built for me suits admirably for what it is adapted, and very easily moved without detriment to the structure. It is perfect and durable, with the additional advantage of its cost being about half of those usually built as a fixture with bricks and mortar, &c.

From
C. J. PRESCOTT, Esq.,
Wirksworth.

I beg to hand you my cheque for Iron Building which is now erected, and looks very well. If you have any enquires from this part you can refer them to me, and I will show them your work; they could not have better.

REGISTERED DESIGN, No. 5989.

Interior of No. 423.

TESTIMONIALS.

From
SWAINTON ADAMSON,
Esq., Kugeley.

GENTLEMEN,—I am very pleased with the House; being first fixed on a good foundation, it makes an excellent house.

From
GILBERT W. STRACEY,
Esq., Rackheath Park.

SIRS,—I enclose cheque due to you. Sir Henry Stracey is much pleased with the Riding School.

From
MESSRS. JONES & SON,
Denbigh.

We are very much pleased with the structure, and shall have very great pleasure in recommending any of our friends to your Firm.

No. 609. IRON WAREHOUSE OR WORKSHOP.

Constructed according to the Specification beneath, with gable louvre ventilators and clerestory lights as shown.

SPECIFICATION OF IMPROVED PORTABLE IRON BUILDINGS.

- Walls.** Constructed of strong unplanned deal framing, morticed and tenoned, and covered outside with best galvanized corrugated iron, No. 24 gauge, coated with pure Silesian spelter, lined with matchboarding.
- Doors.** Square-framed doors, having chamfered stops, fitted with strong hinges, good locks, and handles.
- Windows.** Chamfered casements about 18 in. wide, glazed with 21-oz. sheet glass. Those casements which open for ventilation are fitted with fastener and set-ope.
- Flooring.** Red deal sleeper plates, joists, and $\frac{1}{2}$ -in. planed floor boards.
- Roof.** Consisting of strong deal principals, purlins, and best galvanized corrugated iron, 24 gauge. Matchboarding for lining. Capping to ridge. Gutters to eaves, and down-pipes to the ground.
- Painting.** Door and window frames, doors, casements, barge boards, gutters, and down-pipes painted three coats.
- Carriage.** Carriage Paid to any principal goods station in England, or to Docks for shipment. In sections numbered, ready for easy erection by purchaser on his foundation. Packing will be charged for, but the amount will be allowed in full if cases are returned here carriage paid.
- Prices.** Our prices are put as low as possible compatible with best material and workmanship.
- Terms of Payment.** Terms are Net Cash on delivery
- Foundation.** Brickwork is recommended as the best foundation, the plan for which we will supply free on receipt of order.
- Notices to Local Authorities.** All necessary notices to Local Authorities as to the erection of our buildings must be given by purchasers, as we cannot hold ourselves in any way responsible for the same.

PORTABLE FARM BUILDINGS

AND

COVERED YARDS FOR CATTLE.

The following is an extract from THE AGRICULTURAL GAZETTE, January 31st, 1887:—

"Waste is a sin in any branch of trade, or in any class of business. Whether it is that we are more interested in farming, or that we have more to do with that occupation than any other, however that may be, we are persuaded that *waste* is more prevalent among farmers than any other class of men. We consider that the style of feeding cattle in large yards only furnished with one or, it may be, two side roofs, is wasteful to a degree. Upon English farms, especially those where corn farming is the main characteristic, and where the tenant's capital is only half what it should be, waste by means of large open yards, and resulting in the making down of a large quantity of straw, with a few cattle, cannot be too strongly deprecated. There are those who cry out against covered yards, and in favour of open courts; this we put down as the cry of expediency. If properly-made manure is wanted, straw, even in the case of a covered yard, must be sparingly applied; firebranded manure is but little good, and firebranded will result if straw is improperly used. A tenant on a farm furnished with covered yards, and with a thorough knowledge of the system of feeding cattle, will keep *three times as many beasts*, as will a farmer with wet open yards and upon the old-fashioned heavy turning system; nay, more, he will keep them better and to a larger profit per head. His manure will be veritably manure, and not simply wet straw. It is the quality more than the quantity of manure which makes it valuable; and when we see the straw grown upon, say, 250 acres trampled down by twenty-five or thirty small bullocks in open yards almost devoid of roofing, and without a spout to catch rain water, we cannot refrain from exclaiming, '*Sheer waste: waste of straw, waste of food, waste of money, and positively waste of water.*' If the landlord of that farm would cover these yards, and the tenant properly use them, 100 cattle would not be too many, and his farm and his crops would soon tell where lay the difference between well-made manure and wet straw. Of course, this is largely a question of capital upon the part of the tenant. We are persuaded that for a tenant possessed of ample or sufficient capital no landlord would hesitate to cover cattle yards; the benefit to all parties is so apparent that it could hardly be denied. Cheap roofs, such as **Galvanized Corrugated**, answer the purpose quite well, and for £50 it is really surprising to see the extent of roofing to be got. It is with covered yards or covered boxes that justice is done to cattle, to food, to manure, and therefore to farmer and to farm."

No. 618. PORTABLE FARM BUILDINGS.

TESTIMONIAL.

From J. J. D. RAWLINS, Esq., Lymington.

All the work you have done for me has given me great satisfaction.

Intending purchasers waited upon in any part of Great Britain.

No. 306. COMBINATION IRON COW HOUSE, PIGGERY, AND FOWLS' HOUSE.

REGISTERED COPYRIGHT.

LINED inside with matchboarding; perches and nest boxes for fowls' house; no floor.

Cash Price, about £60 0 0

In sections, ready for easy erection by purchaser on his foundation.

Mangers, Troughs, and Cow House Division extra.
See page 151.

TESTIMONIAL.

From C. McIVER, Esq., Beechfield.

I erected the Iron House with my own men easily, and it is a thoroughly satisfactory building.

Carriage Paid to most Railway Stations in England.

COMBINATION PIGGERY AND FOWL HOUSE.

EXTERIORS of galvanized corrugated iron. Houses cladded inside with 1-in. boards, wood floor raised 6-in. above the ground.

Run 6 ft. by 5 ft. House 5 ft. by 5 ft., with Fowls' House over. Fitted with perches and nest boxes.

Price £9 0 0.

CORRUGATED IRON FENCING.

A VERY efficient Fencing for enclosing Parks, Gardens, &c. Is practically unclimbable, very substantial, and can be erected by ordinary labourers. Made from 4 ft. to 7 ft. high, with either wood or iron rails and standards.

Enlarged block of Serrated Sheet.

6 ft. high, with wood rails and posts.

6 ft. high, with iron rails and posts.

TESTIMONIAL.

MANCHESTER.

GENTLEMEN,—The 457 yards of Corrugated Iron Fencing and Gates you sent to St. Asaph for Cricket and Lawn Tennis Ground have given great satisfaction. It is substantial, and was easily fixed by local men.

(Signed) WILLIAM DAWES, Architect

Special Estimates given upon receipt of particulars of requirements.

CATTLE SHED & YARD, WITH STOCK KEEPER'S COTTAGE.

TESTIMONIAL

From
CAPT. BACON,
Raveningham Hall.

The Span and two Lean-to Cattle Sheds which you erected here last year have given very great satisfaction. The ventilating doors in the end of Span-roof Shed are a great success in hot weather.

(Signed)

John Mendham,
Agent.

REGISTERED COPYRIGHT.

Erected for J. J. COLMAN, ESQ., M.P.

TESTIMONIAL

From CAPT.
G. HEAVISIDE,
Norwich.

The long Corrugated Iron Roof over our twenty bullock boxes and turnip house at Salhouse, for Sir Edward Stracey, does capitally. The bullocks did well under it, and I don't see the least flaw after the last trying winter, which was so disastrous to many of our tiled roofs.

RANGE OF COVERED YARDS.

TESTIMONIAL

From the REV.
C. H. LIPSCOMB,
Howe Rectory.

I have much pleasure in informing you that the Covers you put over my Farm Yards have worn remarkably well, and have given me great satisfaction. I can thoroughly recommend them as being a great saving in straw and in preserving the quality of the manure.

REGISTERED COPYRIGHT.

Erected for R. STROYAN, ESQ., Bixley.

TESTIMONIAL

From
H. HEPBURN, ESQ.,
Scarlsbrick Hall.

DEAR SIR,—The Cattle Shed is fixed to my satisfaction. Your man sent has been very obliging. I hope if I should have more work done by you, that I get the same man to fix it.

COVERED CATTLE YARD.

TESTIMONIAL

From MESSRS.
J. CRISP & SON,
Beccles.

We have pleasure in testifying to the satisfactory manner in which you erected a Covered Yard at Hales for us, the arrangement of the arch being specially convenient for sheltering loads of hay, corn, etc.

REGISTERED COPYRIGHT.

Erected for MESSRS. J. CRISP AND SON, Beccles.

TESTIMONIAL

From
JOHN COSSEY,
ESQ., Church Grove,
London.

The Roofing erected on the farm at Raveningham answers my purpose admirably. I think other land-owners would do well to give their tenants better accommodation for the protection of their stock during the winter.

Iron Roofing, Shedding, and other Estate Work carried out in the most economical way. Estimates free.

IRON ROOFING FOR HAY AND CORN STACKS, COVERED YARDS, CATTLE SHEDDING, &c.

No. 150. HAY BARN, CORN STORES, &c.

THE above illustration represents the simplest form of Corrugated Roofing, as the sheets being curved are self supporting.

Materials consist of necessary galvanized corrugated sheets, No. 22 gauge, wrought-iron tie and king rods, bolts, washers and guttering. Iron columns and sills extra.

Section showing construction of roof.

No. 151. LEAN-TO CART OR CORN SHED.

Section showing construction of roof.

Materials consist of necessary galvanized corrugated sheets, No. 22 gauge, wrought-iron trusses about 10 ft. apart, angle-iron and deal purlins, and deal wall plates, guttering, bolts, etc. Iron columns and sills extra.

No. 152. SPAN-ROOF SHED.

Section showing construction of roof.

TESTIMONIALS

From
M. PARKY, Esq.,
Kitemore, Faringdon,
Berks.
The Shed arrived
safely. It is beautifully
finished and gives great
satisfaction.

From
R. A. LONG, Esq.,
Newton Flotman,
Norfolk.
I am very well pleased
with the Shed, 30 ft. by
21 ft., for Implements,
erected by you.

MATERIALS FOR IRON ROOFING.

No. 6.

Galvanized Cone-headed Screw.

No. 5.

Galvanized Cone-headed Nail.

CONTRASTED with slates and tiles, the saving in timber to carry our Corrugated Iron Sheets is very considerable, the scantlings throughout being of a much lighter character and less in quantity. The principals may be placed about 10 ft. apart, and the purlins from 4 ft. apart. This class of roofing is well understood by country carpenters, and the erection is a matter of great simplicity, and is about the cheapest roof that can be erected.

The sheets we supply are of the best quality only, and thoroughly well galvanized. They are rolled with eight 3 in. deep corrugations, and are gauged before galvanized, so that a 24 gauge sheet, in reality, gauges nearly 22 gauge. These sheets should not be compared with the low-priced sheets usually advertised, which are not efficiently galvanized, and are known to the trade as "wasters." Straight corrugated Sheets, 4 ft. to 8 ft. length, always in stock.

Made in lengths of 5 ft., 6 ft., 7 ft., 8 ft., 9 ft., and 10 ft., 24 and 22 gauge

EACH SHEET COVERS TWO FEET WHEN FIXED

GALVANIZED CORRUGATED IRON RICK COVERS.

PITCH SPAN RICK COVER.

CIRCULAR SPAN RICK COVER.

THESE Rick Covers are made of galvanized iron in two designs as shown, viz., the "Pitch Span" and the "Circular Span" Covers.

The "Pitch Span" Cover has a ventilator running along the ridge, to which are attached galvanized corrugated sheets, so arranged that any one can be easily removed leaving the others quite secure.

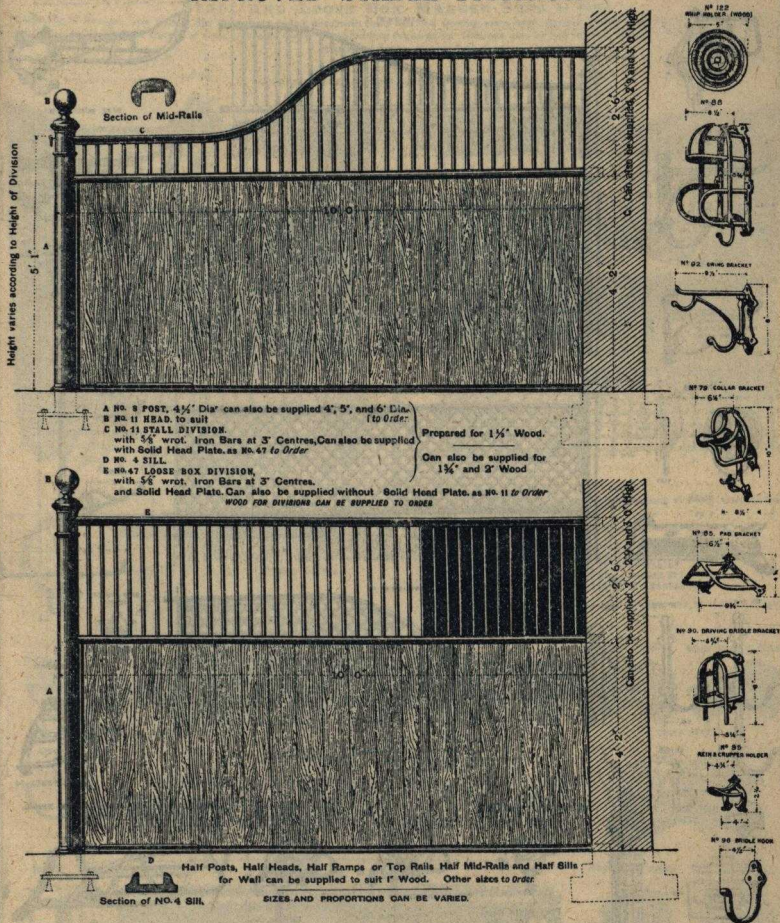

The "Circular Span" Cover is made with curved galvanized corrugated sheets, fastened to wood scantlings placed on the rick, thus providing ample ventilation.

The sheets used each cover 2 feet in width, and are attached to the rick by improved screw fasteners, which hold them quite securely.

The advantages of these galvanized iron Rick Covers over the ordinary thatched covers will be at once apparent,—they are less expensive, and the hay cuts out in much finer condition, the covers being impervious to rain and damp, and any intelligent labourer can fix them in a very short time.

Prices for any particular sizes free on application.
